- ▶ Control and reduce costs with our competitive rates
- ▶ On-demand reporting to quickly track the status of your messages
- ▶ Innovation and reliability from Alicom

### *Alicom - Innovation and reliability for your messaging needs.*

Alicom Systems has been providing messaging and services for over twenty years. We are an acknowledged leader in our field.

### *Send to Inmarsat C Data from your PC*

When you need to send to a vessel, save time and money by sending directly from your PC. Use MS Exchange, MS Outlook, Lotus Notes or any other internet mail package and your existing Internet connection. If you can send Internet email then you can send to vessels using Alicom's Seamail service.

### *Easy to use*

No new software is needed so, once you have registered your email addresses, you can immediately use the service. Simply address your message to Alicom's special email address and your message will be delivered automatically via the Inmarsat C data service.

Store regularly used Inmarsat C numbers in your email address books for easy and quick selection. To create your Seamail message, simply type your message text in the email text box – it's as easy as that!

### *Save time and money*

Once you send your message our system does the rest – receiving your message as email and converting the text to 5-bit ASCII for transmission via the Inmarsat C data service. Delivery is automated, including automatic ocean search to find your vessels whichever ocean they are in.

You'll know when your message is delivered as we send a delivery notification to your email address\*, or a non-delivery notification if your message cannot be delivered.

Our Seamail service requires no investment and once registered you can immediately start saving money with our competitive rates.

Alicom's Seamail is a service which you can rely on, available 24 hours a day, 365 days a year.

\*Inmarsat C is a store and forward service. Delivery reports signify delivery to the Land Earth Station and do not guarantee delivery to the vessels. Unsuccessful messages will receive an Inmarsat C negative advice from the LES after delivery is attempted.

### *Keeping you informed*

In addition to individual Seamail message delivery notifications, you can receive summary reports to email or fax addresses.

**Real time service reports** - you can check message status over the web at [www.alicomsystems.com](http://www.alicomsystems.com)

**Scheduled reports** - are available daily and weekly which show the status of your messages, whether delivered, re-trying or cancelled.

**For more information on our range of services and solutions please contact our headquarters below or visit our website at <http://www.alicomsystems.com>**
