- ▶ Innovation and reliability from Alicom

## *Alicom - Innovation and reliability for your messaging needs.*

Alicom Systems has been providing Internet based messaging services and solutions for over twenty years. We are an acknowledged leader in our field.

## *Send SMS messages from your PC*

When you need to send an SMS, save time and money by sending it directly from your PC. Use MS Exchange, MS Outlook, Lotus notes or any Internet enabled email package and your existing Internet connection.

Sending an SMS is as simple as sending an email. No need to use your mobile phone in fact you do not even need one. Type your messages with the convenience of a full size keyboard.

If you can send Internet email you can use our Email2SMS service immediately. Any time of the day or night from anywhere in the world.

## *Easy to use*

No new software is needed so once you have registered your email addresses, you can make use of the service immediately. Simply address your message to Alicom's special email address and your message will be delivered as an SMS automatically.

To create your SMS simply type your message text in the email box – it's that easy! Alicom's Email2SMS is a service which you can rely on, available 24 hours a day, 365 days a year.

## *Flat Rate World Wide*

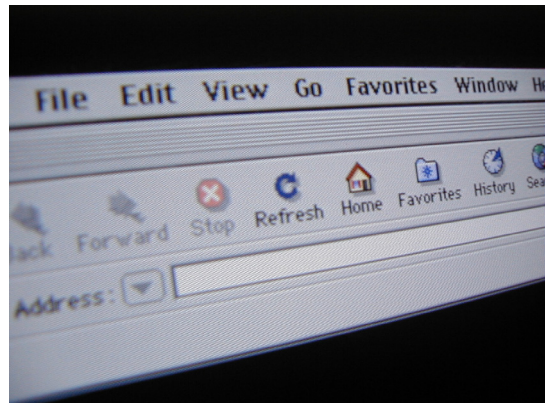

To make our SMS service billing easy to understand we bill a flat rate per SMS to any country and any network worldwide. No need to spend hours looking at complex rates billed per unit!

**For more information on our range of services and solutions please contact our headquarters below or visit our website at <http://www.alicomsystems.com>**

Alicom Systems Limited, 11 Eghams Court, Boston Drive, Bourne End, Bucks, SL8 5YS. United Kingdom.

## *Automatic multi-SMS messages*

If your email exceeds the 160 characters allowed in an SMS message we will automatically break up the email and send as the number of SMS messages required so your customer will always receive the full text you intended to send.

## *Broadcast SMS*

You can send to several SMS messages as easily as to one and you can include email, telex, fax or Seamail addresses if required.

## *Save time and money*

Once you send your message our system does the rest – receiving your message as an email and converting it in to an SMS. Delivery is fully automatic.

You'll know when we have submitted your message to the mobile network as we send you a confirmation to your email address.

Our Email2SMS service requires no investment and, once registered, you can start saving money immediately with our competitive worldwide SMS rates.
