Alicom - Innovation and reliability for your messaging needs.

Alicom Systems has been providing Internet based messaging services and solutions for over twenty years. We are an acknowledged leader in our field.

Send telex messages from your PC

When you need to send a telex, save time by sending directly from your PC. Use MS Exchange, MS Outlook, Lotus Notes or any Internet enabled mail package and your existing Internet connection.

Sending a telex is as simple as sending an email, No need to go near a telex machine – in fact you don't even need one!

Easy to use

Our Email2Telex service requires no investment or new software. Once you have registered your email addresses, you can immediately make use of the service and start saving money with our competitive telex rates.

Simply address your message to Alicom's special email address and your email will be delivered as a telex – completely automatically. Store regularly used telex numbers in your email address books for easy and quick selection.

Save time and money

Once you send your message our system does the rest – receiving your message as email and converting the text into a telex. Delivery is automated including retrying of busy numbers.

Alicom's Email2Telex is a service you can rely on, available 24 hours every day of the year.

Keeping you informed

In addition to individual telex message delivery notifications, you can receive summary reports to email or fax addresses.

Real time service reports - you can check message status over the web at www.alicomsystems.com

Scheduled reports - are available daily and weekly which show the status of your messages, whether delivered, re-trying or cancelled.

Broadcast Telex

You can send messages to several telex numbers as easily as one and you can include email and fax addresses if required.

Receive telex messages too

Alicom offers a complete outsourced telex solution. With Telex2Email you can receive telex messages in your email inbox. We allocate an international telex number for you to give to your correspondents. Any telexes received on this number will be forwarded to your email address.
